DIY Festive Catapult

Materials

- Paddlepop sticks
- Spoon
- Rubber bands
- Festive treats to fling!

Instructions

1. Secure a bunch (~5) sticks together using rubber bands at each end.
2. Secure 2 sticks at one end using a rubber band. Slide the large bundle in between the 2 sticks so these 2 sticks form a “V” shape and secure the bundle in place.
3. Attach a spoon to one side of the “V” with more rubber bands.
4. Place your ammunition into the spoon, pull back and release to force your load to fly!
5. Experiment with different designs and placement of your ‘bundle’ to see how far you can fling your sweets!
