WHY CHOOSE STREET SCIENCE?

Looking for entertaining AND educational family fun? Street Science is your go-to, tried-and-tested event experience provider for kids of all ages.

As Australia's #1 provider of Seriously FUN Science, our award-winning suite of interactive shows and hands-on drop-in lab workshops, as well as our custom programs, are guaranteed to wow children, parents and carers alike, as we share scientific principles in ways that impact all five senses and will keep kids talking for days. **But don't take our word for it, check out a few of our reviews...**

"I have nothing but praise for you guys - this drop-in lab was so great for Skygate. It's given us great foot traffic to the Centre and our website saw a 40% increase in foot traffic during the campaign period. I couldn't have asked for a better result."

ALESSANDRA FISCHMANN
Marketing & Communications Manager

"Absolutely amazing. We have seen the shows twice this week at our local shopping centre and both times has just been mind blowing! Loved the big kids (grown ups) on the sidelines who were more mesmerised than their children, me included."

HANNAH V
Parent

"I couldn't fault it! It was such a fantastic demonstration and it was really impressive how much was fit into a half hour performance. Amongst such a big day of events and activities, we had some customers who showed up right at the end."

NATASHA DUEL
Social Media Officer, Library Services

Since 2012 we've been on a mission to unlock the potential of the next generation of science problem solvers. In collaboration with partners like you, Street Science is now positively impacting hundreds of thousands of kids across Australia each year. At the forefront of this effort is Street Science's passionate team of presenters. Experienced educators AND energetic entertainers, we all hold current Working with Children Blue Card certification and are experts at delivering our fully risk-assessed and comprehensively insured event and entertainment solutions.

Reach out today to discuss which of our science-powered shows and drop-in laboratories are best suited for you, or how we can create a custom program unique to your needs!

COMMUNITY SCIENCE STAGE SHOWS

CHEMISTRY CHAOS

Learn all about chemistry with Street Science's Chemistry Chaos show. Designed to demonstrate how chemical elements and compounds work together, this show will educate and entertain scientists young and old. Be amazed as you watch spectacular colour changes, bright flames and chemical reactions. With Australia's premier science educators, you're sure to walk away from this science stage show feeling energised, inspired, and wanting more.

DIY SCIENCE

Get interactive and hands-on with Street Science's DIY Science show. Learn amazing science facts while your presenter demonstrates incredible science experiments anyone could replicate at home. Using easily sourced materials, you will learn how to manipulate the laws of physics to wow your friends and family, and maybe even teach them a thing or two. Covering a range of topics from chemistry and acoustics to meteorology, this show will have the whole family mesmerised!

EXTREME LIQUID NITROGEN

Experience an exciting Street Science performance showcasing one of the coolest materials on earth – liquid nitrogen. Liquid nitrogen boils at $-196\text{ }^{\circ}\text{C}$, allowing scientists to flash freeze cells and change the properties of numerous materials. Using this substance, your Street Science presenter will deliver a series of visually enticing science demos including creating touchable clouds and spectacular eruptions, allowing you to experience the full force of this abundant atmospheric gas.

FIRE AND ICE

Get ready for a spectacular Street Science show that brings the raw power of fire and ice to life! Imagine clouds billowing, colourful flames dancing, and eruptions right before your eyes. In this exhilarating 30-minute extravaganza, our dynamic Street Science presenter will take you on a thrilling journey through amazing science demonstrations, making complex concepts like sublimation and pyrology easy and fun to grasp. It's not just a science show; it's an awe-inspiring adventure into the wonders of our planet!

FORCES AND FLIGHT

Have you ever wondered how planes fly? Street Science invites you to explore the forces associated with flight and rocketry with our award-winning science communicators. Showcasing a range of scientific demonstrations this show is sure to blow your audience away! Full of meaningful facts and flying objects your presenter will entertain the crowd while exploring Isaac Newton's laws of motion and the physics behind aerodynamics.

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue's needs and ensure a safe and enjoyable experience for all attendees.

COMMUNITY DROP-IN LABORATORIES

ALGINATE WORMS

Get ready for a squiggly, wiggly world of fun. Participants will be buzzing with excitement as they dive hands-on into the science of polymers as they mix and create their own polymer worms. It's a fascinating, gooey adventure into the world of processed materials – perfect for budding scientists eager to learn and experiment!

BATH BOMBS

Transform bath time into a magical science experiment! Junior scientists, get ready to craft your very own spectacular bath bombs! Mix and match dazzling dyes, enchanting scents, and other special ingredients to create bath bombs that burst with colour, fizz, and delightful fragrances.

BOUNCY BALLS

Step into a world where science meets magic! Junior scientists will be amazed as they transform everyday materials right before their eyes. Using PVA powder, they'll get hands-on experience in creating their own neon bouncy balls. Watch as simple substances morph into glowing spheres of fun!

BUBBLE OR GLITTER SLIME

The classic science experiment, slime making is fun for all ages. In this workshop, junior scientists combine materials together with an activating agent to create slime. With your choice of glitter or bubble slime, this is a seriously fun science experience for the whole family!

SNOWSTORM

Get ready to be whisked away into a magical, frosty adventure in our Snowstorm workshop! Imagine being a wizard where with just a sprinkle of our special powder, you create an enchanting blizzard of artificial snow. It's a hands-on experience where you'll watch in wonder as the powder erupts into a snowy landscape.

PRICING

Half-day bookings
from \$2,000 + GST

Full-day bookings
from \$3,000 + GST

Show and lab combos welcomed
Multi-day discounts available

*Minimum charges, weekend surcharges and conditions apply.

CAN'T FIND WHAT YOU'RE AFTER?

Our team can tailor a unique and exciting program just for your event. Whether it's a themed extravaganza or seasonal workshop, we're here to make sure your event shines with engaging, **seriously FUN science entertainment.**
