

INSPIRE and ENGAGE  
the next generation of scientific  
problem-solvers with our  
signature Street Science  
curriculum-aligned incursions.

Tailored for all ages, our incursions  
and resources turn science into  
unforgettable learning moments. Our  
secret? We make real science  
seriously FUN!

# WHY CHOOSE STREET SCIENCE?

Looking for entertaining AND educational fun? Street Science is your go-to, tried-and-tested event and experience provider for students of all ages.

As Australia's #1 provider of Seriously FUN Science, our award-winning suite of interactive Stage Shows, hands-on Workshops and curriculum-aligned Classroom Kits, as well as our custom programs, are guaranteed to wow students, teachers and school leadership teams, as we share scientific principles in ways that impact all five senses and keep kids talking for days. **But don't take our word for it...**

"The students were all engaged and enjoying themselves. Brilliant behaviour management, child friendly language and age-appropriate activities. So much fun! Thank you, we loved all the presenters."

**JENNIFER MCMAHON**  
Payne Road State School

"I can't thank you enough for such a wonderful event today. Our students were awed by the event and many students went away saying I love science and science is so great!!! I would love a flame thrower. Thank you again."

**CHRISTINE VINACCIA**  
Lawnton State School

"Our students and teachers really enjoyed the incursion. The Street Science team are always on time, organised, and enthusiastic about learning, and this is certainly both felt by our students and reflected in their enthusiasm to engage in the activities."

**NATASHA DUEL**  
Social Media Officer, Library Services

Since 2012 we've been on a mission to unlock the potential of the next generation of science problem solvers. In collaboration with partners like you, Street Science is now positively impacting hundreds of thousands of students across Australia each year. At the forefront of this effort is Street Science's passionate team of presenters. Experienced educators AND energetic entertainers, we all hold current Working with Children (Blue Card) certification and are experts at delivering our fully risk-assessed and comprehensively insured services.

Reach out today to discuss which of our Shows, Workshops, and Kits are best suited for your school community. Whether you're interested in individual bookings or exploring our offerings through our partnership model, we can create a program unique to your needs.

EDUCATION

# SCIENCE STAGE SHOWS

WONDERFUL WORLD SHOW

**CURRICULUM CODES:** Queensland Kindergarten Learning Guidelines and Early Years Learning Framework

Little scientists will embark on a 30-minute adventure uncovering the wonders of the world around them! From the mysteries of nature to the wonder of everyday science, this interactive show will leave kids buzzing with curiosity.

BUSY BODIES SHOW

**CURRICULUM CODES:** Queensland Kindergarten Learning Guidelines and Early Years Learning Framework

Join us on a wild journey inside the human body! Kids will explore how different systems work together, keeping us safe, healthy, and full of energy. Watch in awe as we reveal fascinating body functions in action –this is science you can feel!

PREP SIGNATURE SCIENCE SHOW

**CURRICULUM CODES:** ACSSU003, ACSSU005, ACSHE013

Your Prep students will dive into a hands-on 30-minute experience where their senses come to life! Through fun experiments, they'll discover how materials feel, move, and react in the world around them.

YEAR 1 SIGNATURE SCIENCE SHOW

**CURRICULUM CODES:** ACSSU018, ACSSU020, ACSHE021

Year 1 students are exposed to a highly engaging and dynamic interactive 45-minute science show focusing on how everyday materials can be physically changed and exploring how light and sound can be produced and sensed.

Street Science brings learning to life with dynamic Stage Shows, hands-on Workshops, and Classroom Kits designed to ignite student curiosity and engagement!

Our team of expert science communicators delivers incursions that demonstrate, explore, and explain key scientific concepts in ways that resonate with students of all ages.

Aligned with multiple curriculum units and science sub-strands, our programs are perfect for any year level. In true Seriously FUN Science style, our shows and workshops encourage active participation - whether from their seat or right up on stage!

From single-day events to week-long science celebrations, we've created programs that can engage the entire school, making Street Science the perfect partner for your next science event.

Reach out today to discuss which of our Shows, Workshops, and Kits are best suited for your school community. Whether you're interested in individual bookings or exploring our offerings through our partnership model, we can create a program unique to your needs.

1300 150 481 | [info@streetscience.com.au](mailto:info@streetscience.com.au) | [streetscience.com.au](http://streetscience.com.au)

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue's needs and ensure a safe and enjoyable experience for all attendees.

EDUCATION

# SCIENCE STAGE SHOWS

**YEAR 2 SIGNATURE SCIENCE SHOW**

**CURRICULUM CODES:** ACSSU031, ACSSU033, ACSSU032

Hold on tight—Year 2 students are about to be swept up in a 45-minute exploration of forces, mixing materials, and Earth’s hidden resources! This hands-on adventure will show them how things move, combine, and shape the world.

**YEAR 3 SIGNATURE SCIENCE SHOW**

**CURRICULUM CODES:** ACSSU049, ACSSU046

Things are heating up in this 45-minute exploration of heat energy! Year 3 students will witness how heat changes materials, triggers reactions, and fuels the world around them in jaw-dropping demonstrations.

**YEAR 4 SIGNATURE SCIENCE SHOW**

**CURRICULUM CODES:** ACSSU076, ACSSU074

Year 4 students will uncover the hidden secrets of materials, from natural wonders to processed creations. With thrilling force-based experiments, they’ll see firsthand how science shapes everyday life.

**YEAR 5 SIGNATURE SCIENCE SHOW**

**CURRICULUM CODES:** ACSSU077, ACSSU080

Light up your imagination with our dazzling 45-minute show for Year 5 students! They’ll explore how light bends, bounces, and transforms while uncovering the science behind solids, liquids, and gases.

**YEAR 6 SIGNATURE SCIENCE SHOW**

**CURRICULUM CODES:** ACSSU095, ACSSU219

Prepare for explosive fun as Year 6 students experience the science of transformation! From reversible changes to energy conversions, this 45-minute show delivers unforgettable experiments with real-world connections.

**HIGH SCHOOL SCIENCE SHOW**

**Chemical Sciences and Physical Sciences across Year 7-10**

Let us create the ultimate science experience tailored to your curriculum! Our qualified science presenters will customise a 45- or 60-minute show based on the chemical or physical sciences your students are currently exploring, featuring jaw-dropping demonstrations guaranteed to keep them on the edge of their seats.

**Reach out today** to discuss which of our Shows, Workshops, and Kits are best suited for your school community. Whether you’re interested in individual bookings or exploring our offerings through our partnership model, we can create a program unique to your needs.

**1300 150 481 | [info@streetscience.com.au](mailto:info@streetscience.com.au) | [streetscience.com.au](http://streetscience.com.au)**

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue’s needs and ensure a safe and enjoyable experience for all attendees.

EDUCATION

# SCIENCE WORKSHOPS

**SNOW MAKING: WONDERFUL WORLD**

**CURRICULUM CODES:** Queensland Kindergarten Learning Guidelines and Early Years Learning Framework

Awaken the investigative minds of your youngest scientists with our spectacular Snow Making workshop! This lesson focuses on using the senses to understand how to use observable evidence to classify curious materials and assess whether they're real or fake

**SUN SAFETY: BUSY BODIES**

**CURRICULUM CODES:** Queensland Kindergarten Learning Guidelines and Early Years Learning Framework

Awaken the investigative minds of your youngest scientists with our spectacular Sun Safety workshop! This lesson focuses on exploring the effects of the sun as students strengthen their fine motor skills while making a UV light reactive bracelet.

**SNOW MAKING: SENSORY SCIENCE**

**CURRICULUM CODES:** ACSSU003, ACSHE013

Capture the curiosity and sharpen the senses of your students with our sensational Sensory Science lesson! Your students will learn to make sense of the world around us, exploring what they can see, hear, smell, taste, and touch by creating instant snow and identifying its unique properties. Using scientific language, your class will describe the magic of building their very own winter wonderland.

**CHEEKY CHANGES**

**CURRICULUM CODES:** ACSSU018, ACSHE021, ACSIS213

Students experience how the physical properties of everyday materials can be changed by manipulating a common polymer. The group is guided through a procedure and discussions to make, describe and compare bouncy balls that they get to keep and take home.

It's all about learning by doing – questioning ideas, developing inquiry skills, and following the scientific process.

Our hands-on Workshops are designed to complement classroom units year-round, each focused on a specific Science Understanding sub-strand or concept. Delivered with supporting worksheets, they allow students to further explore activities back in the classroom.

You can book any of our science experiences independently or combine them for a more immersive learning journey. Talk to us today about tailoring science incursions to meet the unique needs of your students or school.

Reach out today to discuss which of our Shows, Workshops, and Kits are best suited for your school community. Whether you're interested in individual bookings or exploring our offerings through our partnership model, we can create a program unique to your needs.

1300 150 481 | [info@streetscience.com.au](mailto:info@streetscience.com.au) | [streetscience.com.au](http://streetscience.com.au)

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue's needs and ensure a safe and enjoyable experience for all attendees.

EDUCATION

# SCIENCE WORKSHOPS

## GET IT GROWING

**CURRICULUM CODES:** ACSSU017, ACSSU211, ACSIS024

Get ready to learn all about what living things need to survive! Students explore the different parts of plants and relate each to their function. Then it's time to get their hands dirty and pot a real plant with everything it needs to grow at home or in the classroom.

## ROCKET SCIENCE: PUSH/PULL POWER

**CURRICULUM CODES:** ACSSU033, ACSHE034

Students investigate Newton's laws of physics by building and launching CO2 rockets. Theory components link into the Year 2 curriculum allowing for the exploration of push and pull forces.

## PERFECT POLYMERS: MIXING MATERIALS

**CURRICULUM CODES:** ACSSU031, ACSIS038, ACSIS041

Mix things up in your science curriculum by slipping and sliming into our Mixing Materials classroom kit! Transform your students into Classroom Chemists as they learn different ways to create physical changes to materials. Your students will be oozing with fascination as they investigate the properties of various materials and combine safe chemicals to formulate their very own take-home slime!

## HARDCORE HEAT

**CURRICULUM CODES:** ACSSU049, ACSSU046, ACSHE051

Students are led through a number of hands-on activities to investigate different ways that heat can be produced and conducted through various materials or used to change a material's state.

## MAD MICROSCOPES: IS IT LIVING?

**CURRICULUM CODES:** ACSSU044, ACSHE050

Students get hands-on as they observe the difference between living and non-living specimens. Students get to use the latest digital microscopes including hand-held's w/LCD display to capture digital images of their discoveries.

## ROCKET SCIENCE: THE FORCES OF FLIGHT

**CURRICULUM CODES:** ACSSU076, ACSIS064

Students investigate Newton's laws of physics by building and launching CO2 rockets. This workshop has been modified so the theory component links into the curriculum focusing on exploration of contact forces, non-contact forces, and aerodynamics.

Reach out today to discuss which of our Shows, Workshops, and Kits are best suited for your school community. Whether you're interested in individual bookings or exploring our offerings through our partnership model, we can create a program unique to your needs.

1300 150 481 | [info@streetscience.com.au](mailto:info@streetscience.com.au) | [streetscience.com.au](http://streetscience.com.au)

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue's needs and ensure a safe and enjoyable experience for all attendees.

EDUCATION

# SCIENCE WORKSHOPS

## CREATING PROCESSED MATERIALS

**CURRICULUM CODES:** ACSSU074, ACSHE062

This workshop involves students completing a guided hands-on investigation which expand their knowledge of processed materials. Students will mix various chemicals to produce a number of amazing polymers.

## PERFECT POLYMERS: NON-NEWTONIAN FLUIDS

**CURRICULUM CODES:** ACSSU077, ACSHE083

Students complete two investigations exploring the behaviour of particles within solids, liquids and gasses to appreciate how this affects materials' uses in every-day life.

## MAD MICROSCOPES: WINGS OR LIMBS

**CURRICULUM CODES:** ACSSU043, ACSHE083, ACSIS093

Students use the latest digital microscopes to observe a range of biological specimens and identify structural features that allow them to survive in different environments. These hand-held, LCD display microscopes capture digital images of student's discoveries. Teachers will receive a selection of microscope images with labels after the incursion.

## SEE THE LIGHT

**CURRICULUM CODES:** ACSSU080, ACSHE081, ACSHE083

This workshop involves students completing guided hands-on investigations which will expand their knowledge of light absorption, reflection and refraction. Students will participate in four unique workstations throughout their session.

## PERFECT POLYMERS: CHEMISTRY IN ACTION

**CURRICULUM CODES:** ACSSU095, ACSIS103

This workshop consolidates student knowledge about chemical and physical change through 2 different investigations. Using their knowledge of fair testing, students make two different polymers by changing one variable. They then discover how materials can absorb moisture through a reversible physical change.

## ENERGY & ELECTRICAL CIRCUITS

**CURRICULUM CODES:** ACSSU097, ACSHE098

Students use 'snap together' circuits to build a variety of circuits including; an FM radio, connect bulbs in series and parallel, investigate insulators and conductors, and wire batteries in both series and parallel circuits.

Reach out today to discuss which of our Shows, Workshops, and Kits are best suited for your school community. Whether you're interested in individual bookings or exploring our offerings through our partnership model, we can create a program unique to your needs.

1300 150 481 | [info@streetscience.com.au](mailto:info@streetscience.com.au) | [streetscience.com.au](http://streetscience.com.au)

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue's needs and ensure a safe and enjoyable experience for all attendees.

science

# EDUCATION CLASSROOM KITS

**SNOW MAKING: WONDERFUL WORLD**

**CURRICULUM CODES:** Queensland Kindergarten Learning Guidelines and Early Years Learning Framework

Bring the wonder of science to kindergarteners with our fun Classroom Kit! Little scientists will safely create fake snow, exploring it with their senses, making observations, and expressing creativity by drawing in the snow—feelings or masterpieces!

While the snow stays behind, each student takes home a flyer with a QR code to unlock DIY science experiments on our website. Let the science fun continue at home!

**SNOW MAKING: SENSORY SCIENCE**

**CURRICULUM CODES:** ACSSU003, ACSHE013

This Classroom Kit is recommended for Prep/Foundation students. It involves the students making their very own fake snow and encourages them to safely make observations about their snow using their senses. Students explore the material the fake snow is made from and are encouraged to describe the observable properties before packing it up to take home.

**SUNNY SCIENCE**

**CURRICULUM CODES:** ACSSU004, ACSSU003

Understand how daily and seasonal changes in our environment affect our everyday lives. The focus of this lesson - the sun! Using UV reactive materials, including paper and beads, students will see how sunscreen and clothing can help keep us sun safe. Grab the sunscreen, it's going to be a seriously fun science day out.

**CHEEKY CHANGES: BOUNCY BALLS**

**CURRICULUM CODES:** ACSSU018, ACSHE021, ACSIS213

Spring into seriously fun science education with our Bouncy Ball Classroom Kit! This lesson will have your students bouncing with enthusiasm as they embark on a journey of discovery to learn what happens when changes are made to different materials. Lead your students through creating their own bouncy balls so they can experience chemistry in action and have a fun new toy to take home and play with!

**INSPIRE** your students with our **EXCITING Classroom Kits!** Engage tomorrow's science leaders by giving them hands-on experiences with the concepts they're learning.

Designed by educators, Street Science kits make science FUN and accessible for all ages. Each kit integrates and meets Australian curriculum standards, helping students grasp new concepts through engaging, student-centered investigations.

Street Science delivers STEM education that sticks. Our Classroom Kits include resources for up to 30 students (excluding Wonderful World), video modules, and printed instructions for flexible, self-paced learning. Access our extended learning portal (ELP) for additional resources and videos that bring lessons to life.

With Street Science, you're not just teaching science — you're inspiring the next generation of scientific problem-solvers. Get your Classroom Kit today and create unforgettable lessons!

**GET IT GROWING: LIVING THINGS**

**CURRICULUM CODES:** ACSSU017, ACSSU211, ACSIS024

From little things, big things grow! Plant the seed of passion for biology in the minds of your students as they explore the external features of living things and their life cycles. This fully equipped learning kit comes with everything your budding scientists will need to put theory into practice and get their hands dirty, as they pot their very own plant with everything it needs to flourish and grow!

**Bring hands-on science to your classroom with our DIY Classroom Kits!**

Reach out today to learn more about how our Classroom Kits can transform your lessons—and don't forget to ask about our exciting science shows and workshops for even more interactive fun!

1300 150 481 | [info@streetscience.com.au](mailto:info@streetscience.com.au) | [streetscience.com.au](http://streetscience.com.au)

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue's needs and ensure a safe and enjoyable experience for all attendees.

# EDUCATION CLASSROOM KITS

## ROCKET SCIENCE: PUSH AND PULL

**CURRICULUM CODES:** ACSSU033, ACSHE034

Ready...set...launch! Watch your students transform into a team of Rocketeers as they shuttle through this unforgettable lesson on the forces around us. Through developing their understanding of pushes and pulls, gravity and friction, your class will be mesmerised by the many ways that applying forces can affect an object's movement. May the force be with you!

## PERFECT POLYMERS: MIXING MATERIALS

**CURRICULUM CODES:** ACSSU031, ACSIS038, ACSIS041

Mix things up in your science curriculum by slipping and sliming into our Mixing Materials classroom kit! Transform your students into Classroom Chemists as they learn different ways to create physical changes to materials. Your students will be oozing with fascination as they investigate the properties of various materials and combine safe chemicals to formulate their very own take-home slime!

## PERFECT POLYMERS: COOL CHEMISTRY

**CURRICULUM CODES:** ACSSU049, ACSSU046, ACSIS053

Is your class ready to turn up the heat? Your students will be fired up as they see various states of matter transform before their eyes when heat is applied or removed in this trailblazing lesson. They'll then witness the power of state changes by examining how different materials behave under different circumstances and the outcome of these changes on everyday objects.

## HARDCORE HEAT

**CURRICULUM CODES:** ACSSU049, ACSSU046, ACSHE051

Ready to turn up the heat? In this kit, explore how heat is produced, conducted, and used to change a material's state. Your students will conduct chemical reactions before their eyes and examine the temperature changes that occur!

## ROCKET SCIENCE: FORCES OF FLIGHT

**CURRICULUM CODES:** ACSSU076, ACSIS064

Fasten your seatbelts and get ready for liftoff in 3, 2, 1...! Take your students on a Rocket Science expedition that gives them the opportunity to investigate Newton's laws of physics through building and launching their own CO2 rockets. Through the course of the lesson, they'll also explore how applying contact and non-contact forces can change the movement of an object.

## CREATING PROCESSED MATERIALS

**CURRICULUM CODES:** ACSSU074, ACSHE062

Wacky Worms, Balls and All, cause we are living in a material world! Watch as your students morph into Classroom Chemists by using natural and processed materials to learn about the fundamental stages of change, and create their own wacky creations while they're at it. This transformative classroom kit treats your students to a hands-on experimentation session where they'll mix various mesmerising materials to make some weird and wild polymers.

### Bring hands-on science to your classroom with our DIY Classroom Kits!

Reach out today to learn more about how our Classroom Kits can transform your lessons—and don't forget to ask about our exciting science shows and workshops for even more interactive fun!

1300 150 481 | [info@streetscience.com.au](mailto:info@streetscience.com.au) | [streetscience.com.au](http://streetscience.com.au)

Please Note: Not all of our shows are suitable for indoor venues. To ensure the best experience and adherence to safety protocols, we strongly advise discussing the specific requirements and suitability of your chosen show with Street Science prior to booking. This will help us tailor the event to your venue's needs and ensure a safe and enjoyable experience for all attendees.

# EDUCATION CLASSROOM KITS

## PERFECT POLYMERS: STATES OF MATTER

**CURRICULUM CODES: ACSSU077, ACSHE083**

Is it a solid? Is it a liquid? Is it a gas? Or is it something more mysterious? This lesson will answer all these questions and more! Your junior scientists will investigate particle behaviour within solids, liquids and gases, and how this influences the ways we use everyday materials. This lesson is sure to stimulate a great deal of discussion amongst your students as they learn more about why matter matters!

## SEE THE LIGHT

**CURRICULUM CODES: ACSSU080**

Can you see the light? In this classroom kit, students will learn about the nature of light whilst discovering the difference between reflection, refraction and shadows.

## PERFECT POLYMERS: CHEMISTRY IN ACTION

**CURRICULUM CODES: ACSSU095, ACSIS103**

To find the answer, sometimes you've got to ask the right question. In this lesson, students will learn how to change or keep variables the same to explore measurable changes to their polymers through their own fair test. Delving further into reversible and irreversible changes, your class will discover how a simple change in chemical processing can significantly affect observable physical outcomes.

## GET IT GROWING: RESULTS MAY VARY

**CURRICULUM CODES: ACSSU094, ACSIS103, ACSIS104**

Follow fair testing procedures and investigate how changes to the physical conditions of an environment affects the growth and survival of seeds. Warning - results may vary in this Get It Growing experiment!

## ATMOSPHERIC SCIENCE

**CURRICULUM CODES: ACSCH042, ACSCH045, ACSCH046, ACSCH053, ACSCH054, ACSCH067, ACSES080, ACSES014, ACSES022, ACSES024**

Embark on an exciting atmospheric science adventure! Dive into air pollution, uncover particle deposition rates, and unveil the mysteries of acid rain's impact on our world. Discover the fun side of environmental science.

**AVAILABLE FOR SENIOR SECONDARY ONLY, YEAR 11 - YEAR 12.**

## ELECTROMAGNETISM

**CURRICULUM CODES: ACSPH2022, ACSPH025, ACSPH037, ACSPH038, ACSPH039**

Dive into the electrifying world of energy and electromagnetism! Uncover the secrets of different energy types building a Hand Crank Generator and an Electromagnetic Train. Get ready to be amazed as you learn how these fundamental forces shape our world and discover the endless possibilities of electromagnetism in modern technology and research!

**AVAILABLE FOR SENIOR SECONDARY ONLY, YEAR 11 - YEAR 12.**

### Bring hands-on science to your classroom with our DIY Classroom Kits!
